

## Sekisui House breaks the record with 92% net zero energy house in fiscal 2021.

Initiatives to make net-zero-energy common across both single and multifamily homes, to enhance resilience and take action on climate change.

Sekisui House, Ltd. achieved a record with 92% of all our newly built detached houses being net zero energy house\* in fiscal 2021. Sekisui House has now built a cumulative total of 69,163 net zero energy house as of the end of March 2022.

\*Based on Japanese standards.

In addition, Sekisui House is promoting net-zero-energy in all of its multifamily residential buildings, including rental housing and condominiums for sale, and the number of net-zero-energy rental housing units ordered in FY2021 tripled from the previous year to 8,501 units, bringing the cumulative total to 12,307 units. As a result of these efforts, the annual reduction in CO<sub>2</sub> emissions of the homes we supplied in fiscal 2021 reached 55% compared to the fiscal 2013 level. The number of units in net-zero-energy condominiums completed in fiscal 2021 was 160, bringing the cumulative total to 192 units.

\* Sustainable open Innovation Initiative, Net Zero Energy House Demonstration Project Report 2021

In Japan, Sekisui House focuses on disaster resilience, such as selling houses that can provide a certain level of living even during power outages through a combination of solar cells, fuel cells, and storage batteries. We have also strengthened countermeasures against flooding under the floor in newly built detached houses.

---

Global warming countermeasures include the concept of mitigation measures that minimize global warming, and adaptation measures for when global warming progresses. Sekisui House will continue to lead the industry in mitigation through the decarbonization of residences and the expansion of net zero energy house, as well as adaptation measures by enhancing the resilience of homes.
